Welcome to Back In Line!

We're a different kind of chiropractor: we think holistically and have expertise with advanced techniques that only a handful of chiropractors know. Our methods work and we have a long track record of successfully treating the most challenging injuries to prove it. It's our greatest source of pride that the vast majority of the people we treat have found us through referrals from happy patients.

Come on in for a visit – we can't wait to welcome you to the family!

How We're Different

Our Philosophy

We believe that chiropractic care shouldn't be a crutch, and we focus on holistic care to address the root of the problem for lasting results.

Meet Our Patients

Rodrigo Navarrete - World Champion Kickboxer

"I've been in the Martial Arts for 41 years. Since I've been under the care and direction of Back In Line Chiropractic Center, my body has become twice as flexible, strong, balanced, calm ... the list goes on. I'm living proof that Dr. Peter and Dr. Barbara Marciante and staff take great pride in their work. At 51 years of age, I feel 20 years old physically. Thank you Back In Line!"

Bernex Fleurinor - Professional Bodybuilder, Former Mr. USA

"I never knew what a true chiropractor really meant until I received treatment from your office. The passion and the pride you've shown in your line of work is impeccable and that is why I am was able to become the champion that I am today. For that I thank you very much."

Chris Chambers - NFL Pro Bowl Wide Receiver for the Miami Dolphins

"I've been coming to Back in Line for two years. I have not had any injuries or set backs since coming here and I have not missed a workout, practice, or game. I feel a lot stronger and faster, and I have better balance.

I used to get bad tendonitis in my knees, but not since seeing Dr. Peter. I like the people that work here: a dedicated staff, and an office with a real family environment."

Do you have a solid foundation?

Your feet are the foundation for your entire body. We proudly use the latest bilateral 3-D scanner from Foot Levelers to prescribe custom orthotics to help everything stay in proper alignment.
